

DPI-500

Yamato

Washdown Digital Indicator

The DPI-500 is a tough, versatile, stainless steel, washdown indicator that can be used to drive up to eight 350 ohm load cells. It is NTEP certified legal for trade, has a large easy to read LED display, has full duplex RS-232 serial communications and can be powered by an AC adaptor. An excellent indicator for a truck, floor or mechanical scale! NEMA-4X washable, making it perfect for use in fish, poultry and meat processing or in any other wet, messy environment.

Features

- Stainless Steel Construction
- Bright, LED Display with Annunciators
- NEMA 4X Washdown with Optional Battery Pack
- Full Duplex RS-232 Serial Communications
- Legal for Trade at 5000 Divisions
- Push Button Tare
- Initial, Automatic and Semi-automatic Zero Setting Mechanisms

Reliability you can trust
